

NEW

GigaCore 10

Luminex
NETWORK INTELLIGENCE

Strong, versatile and reliable. Everything you need for live events.

The brand new GigaCore 10 is definitely the most versatile GigaCore ever designed by Luminex Network Intelligence. The half 19" unit with front and rear connectivity can be mounted in a truss as well as in a rack, either with the included long brackets to do a single mount or by coupling two devices to create a redundant double mount (primary/secondary).

The robust metal enclosure and rugged Ethercon and optional Fiber connectors make the unit ideal for truss mounted applications. Optionally, there are also wall mount brackets available for fixed installations.

The key features

The GigaCore 10 is designed for applications with Ethernet enabled devices (f.e. moving lights, PA systems, cameras or stage connectivity).

- 8 x Gigabit Ethercon port
- 2 x slots for rugged fiber connectivity
- Converged networking: lighting, audio and video over IP
- Easy group function with pre-configured VLANs
- ArtNet, sACN, MANet, Dante™, RAVENNA/AES67, Q-LAN, PTPv2, RTTrPL (BlackTrax) and more ...
- RGB LEDs for group color indication
- Link aggregation (MultiLinkX)
- Optional PoE supply
